PURKISS ROSE-RSI

SKATE PARK

City of Modesto, California

Project Description:

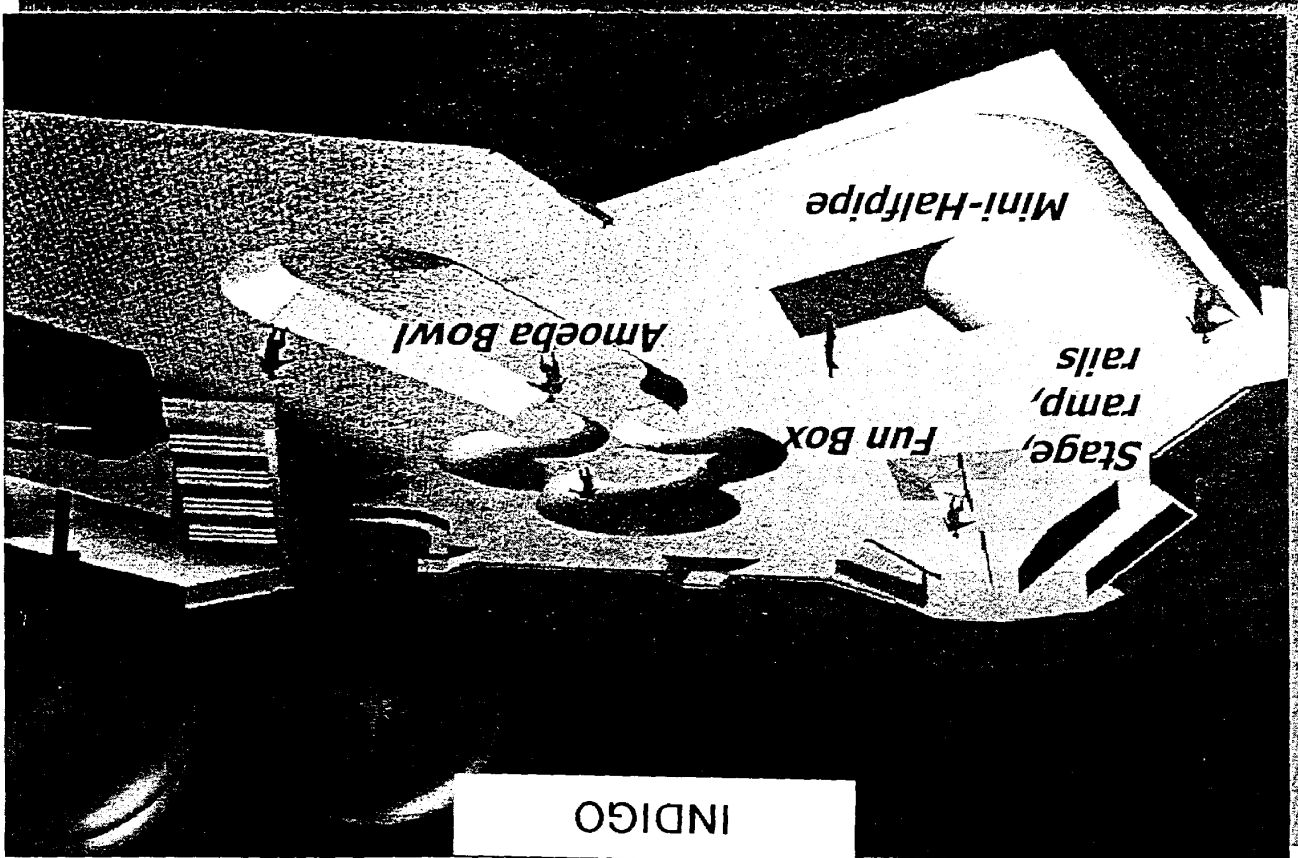

The City of Modesto, as a result of an ordinance restricting skating in public places and in response to a need to provide a place for the youth in their community to skate, has built a 13,000 square foot Skate Park. The Skate Park is located at Beyer Community Park, which features both active and passive amenities. The Park is located next to a high school. Utilizing a Skate Park Task Force of talented skaters and supporters, the team worked with purkiss-rose-rsi in the development and refinement of a state-of-the-art skate facility. The design process included three workshops with the Task Force and presentations to the Commission and City Council. The skating surface offers the skaters a street course, mini bowl with 20 foot long spine and a long snake run with bowls. The park offers something for everyone at all skill levels.

The park has proven to be a great success and will lead to the construction of a second skate park in the near future.
